CISA Boot Camp

Cyber Security knows how critical Information Security and knowledge truly is in today's fast-paced world. Equally important is an Information Security professional who can establish a stronghold on the security of information while creating and administering programs and policies to combat security breaches.

Cyber Security's Certified Information Systems Auditor (CISA) Boot Camp is specifically designed to provide CISA candidates with skills necessary to develop, manage, and supervise programs to defend against unauthorized admittance to information. In addition, our boot camp is focused on preparing students for the CISA examination through testing of knowledge and the ability to apply it to real world scenarios.

The correct answers of each question are also reviewed for a better understanding of expectations of the ISACA Certification Board. This intensive course is an ideal way to prepare for the exam. Participants gain valuable experience reviewing these core sections and answering sample exam questions with an experienced instructor while strengthening their skills and building confidence.

Cyber Security's CISA Boot Camp is a five-day intensive seminar that focuses exclusively on the essential areas covered in the CISA® exam. The review course covers the core sections and a series of sample exam questions that provides participants with a "feel" of the format and the types of questions encountered on the CISA exam.
